

Configuration Management Plan

PROJECT CONTROL & TRACEABILITY DOCUMENT

Project Name	Toplab EHR
Team Members	EMMANUEL B. PASCUA (Leader) ALLYSA GRACE S. BASBAS ARIEL DAVE D. MILO JHON REY F. SAMSON KATRINA ABBIE S. TUCAY
Repository URL	https://github.com/Fw1zzy/toplab-ehr-frontend

1. Configuration Items

Configuration items (CIs) are grouped into five categories: Source Code, Documentation, Dependencies/Environment, Data/Schema, and Build/Configuration Scripts.

Name	Category	File Path	Owner	Ver.	Status
Root .gitignore	Build/Config Scripts	<code>.gitignore</code>	ALLYSA GRACE S. BASBAS	v1.0.0	Ongoing
Root README	Documentation	<code>README.md</code>	KATRINA ABBIE S. TUCAY	v1.0.0	Ongoing
Next.js Config	Build/Config Scripts	<code>next.config.ts</code>	EMMANUEL B. PASCUA	v1.0.0	Ongoing
TypeScript Config	Build/Config Scripts	<code>tsconfig.json</code>	EMMANUEL B. PASCUA	v1.0.0	Ongoing
Package Dependencies	Dependencies/Env	<code>package.json</code> , <code>package-lock.json</code>	EMMANUEL B. PASCUA	v1.0.0	Ongoing
Tailwind Config	Build/Config Scripts	<code>postcss.config.mjs</code>	EMMANUEL B. PASCUA	v1.0.0	Ongoing
ESLint Config	Build/Config Scripts	<code>eslint.config.mjs</code>	EMMANUEL B. PASCUA	v1.0.0	Ongoing
Global CSS	Build/Config Scripts	<code>src/app/globals.css</code>	ARIEL DAVE D. MILO	v1.0.0	Ongoing
Environment Variables	Dependencies/Env	<code>.env</code>	EMMANUEL B. PASCUA	v1.0.0	Ongoing
App Entry Points	Source Code	<code>src/app/layout.tsx</code> , <code>src/app/page.tsx</code> , <code>src/app/providers.tsx</code>	EMMANUEL B. PASCUA	v1.0.0	Ongoing
Dashboard Route	Source Code	<code>src/app/(protected)/dashboard/page.tsx</code>	JHON REY F. SAMSON	v1.0.0	Ongoing

1. Configuration Items (Continued)					
Name	Category	File Path	Owner	Ver.	Status
Patients Route	Source Code	src/app/(protected)/patients/page.tsx, [id]/page.tsx	ALLYSA GRACE S. BASBAS	v1.0.0	Ongoing
Inventory Route	Source Code	src/app/(protected)/inventory/page.tsx	ARIEL DAVE D. MILO	v1.0.0	Ongoing
Services Route	Source Code	src/app/(protected)/services/page.tsx	KATRINA ABBIE S. TUCAY	v1.0.0	Ongoing
Reports & Staff Routes	Source Code	src/app/(protected)/reports/page.tsx, staff/page.tsx	JHON REY F. SAMSON	v1.0.0	Ongoing
Other Clinical/Finance Routes	Source Code	src/app/(protected)/* (queue, billing, etc.)	ALLYSA GRACE S. BASBAS	v1.0.0	Ongoing
Public Routes (Login)	Source Code	src/app/login/page.tsx, layout.tsx	ALLYSA GRACE S. BASBAS	v1.0.0	Ongoing
UI Components	Source Code	src/components/ui/StatCard.tsx, StatusBadge.tsx, etc.	KATRINA ABBIE S. TUCAY	v1.0.0	Ongoing
Layout Components	Source Code	src/components/layout/AppSidebar.tsx, Topbar.tsx	ARIEL DAVE D. MILO	v1.0.0	Ongoing
Custom Hooks	Source Code	src/hooks/useRequireAuth.ts	EMMANUEL B. PASCUA	v1.0.0	Ongoing
API Layer & Likha	Source Code	src/lib/api/index.ts, likha/index.ts	EMMANUEL B. PASCUA	v1.0.0	Ongoing
Mock Data Store	Data/Schema	src/lib/api/mock/data.ts	JHON REY F. SAMSON	v1.0.0	Ongoing
Data Queries & Mutations	Source Code	src/lib/queries/usePatients.ts, useDashboard.ts, etc.	EMMANUEL B. PASCUA	v1.0.0	Ongoing
Auth Logic & Providers	Source Code	src/lib/auth/AuthProvider.tsx	EMMANUEL B. PASCUA	v1.0.0	Ongoing
Utility Functions	Source Code	src/lib/utils/index.ts	EMMANUEL B. PASCUA	v1.0.0	Ongoing
API Proxy Setup	Source Code	src/proxy.ts	EMMANUEL B. PASCUA	v1.0.0	Ongoing

2. Baseline

The **baseline** for this project is defined as the current state of the main branch. All configuration items listed above are versioned relative to this baseline as **v1.0.0**. Any future modification to a CI is measured as a change against this reference point.

3. Version Conventions

This project follows **Semantic Versioning (SemVer)**: MAJOR.MINOR.PATCH

- **MAJOR** – incremented for breaking changes (e.g., a redesigned folder structure, major framework upgrade).
- **MINOR** – incremented for new features that do not break existing functionality (e.g., adding a new page or UI component).
- **PATCH** – incremented for bug fixes and small internal corrections (e.g., fixing a typo, resolving a UI bug).

All configuration items currently start at **v1.0.0** as the initial baseline version.

4. Status Accounting

Each configuration item is assigned one of the following statuses:

Status Tag	Meaning
Under changes/ongoing	The item is actively being developed or revised.
Suspended	Work on the item has been paused.
Superseded	The item has been replaced by a newer version or approach and is no longer in active use.

*Currently, all listed configuration items are marked **Under changes/ongoing**, reflecting the project's active development phase.*

5. Traceability

Every change to a configuration item follows this traceability flow:

1. **Reason for Change** – A team member identifies a need (bug, new requirement, adviser feedback) and documents it.
2. **Approval** – The change is reviewed and approved by the team lead (EMMANUEL B. PASCUA).
3. **Implementation** – The approved change is made, committed to the repository with a clear commit message referencing the reason.
4. **Update Record** – The configuration item table's Version and Status fields are updated accordingly to reflect the new state.
